

ROLES & FEATURES GUIDE

Who can do what in the Employee Management System

Sri Annamalai Global Business Service

Two Different Things

Every person has both of these — and they are not the same thing.

Login Role

Controls what someone can SEE and DO in the system.

Only 7 of these exist:
Founder, Executive, Admin, HR, Accountant, Manager, Employee.

Changed only on the User Accounts screen, by Admin.

Designation & Department

Describes WHO someone is — their actual job title and team.

Purely descriptive — it never changes what buttons someone sees.

Changed on the employee's own Edit Profile screen.

Example: Parameswari's Login Role is **HR** — but her real job is **Data Entry Supervisor** in the Data Entry department. Changing one never changes the other.

The 7 Roles, at a Glance

A full, live, editable breakdown of all 29 underlying permissions is always in the app: Admin → Roles & Permissions.

Login Role	Who this is for	Company-wide data?	Sees payroll?	Runs the system?
Founder	The business owner	Yes	Full control	No
Executive	A second owner / co-founder	Yes	Full control	No
Admin	IT / system administrator	Yes (people & org)	No, never	Yes
HR	Human Resources staff	Yes (people & leave)	No	Partly (org setup)
Accountant	Payroll / finance staff	No (money only)	Full control	No
Manager	Anyone with direct reports	Own team only	No	No
Employee	Everyone else	Self only	No	No

Founder & Executive

The owner, and a second owner (e.g. CEO/COO) with identical authority — full control of people and money, but not the system itself.

Dashboard
Company-wide live numbers: attendance, leave, tasks, payroll.

Employees
Full profiles for everyone; can edit department & job title.

Attendance
See, fix, and correct anyone's attendance, company-wide.

Leave
Approve, reject, or record leave for anyone in the company.

Company Tasks
Create and assign tasks across the whole company.

Salary & Payroll
Set salaries, run payroll, mark payments paid — full control.

Expense Claims
Approve, reject, or pay any claim (never their own).

Audit Logs
The full history of every action taken in the system.

Cannot do: Create logins, reset passwords, change Login Roles, or manage system/org setup — that stays with Admin.

Admin

Runs the system day to day. Deliberately has zero payroll access — controls the software, never the money.

Employees
Create, edit, and deactivate any employee; full profiles.

Departments & Job Titles
Full control over the company's org structure.

Attendance & Leave
Fix, correct, or record for anyone, company-wide.

Leave Types & Holidays
Defines leave categories and the holiday calendar.

Document Types
Defines what documents employees can upload.

User Accounts
Resets any password, changes any Login Role — even Founder's.

Roles & Permissions
Grants or removes a permission, role by role, live.

Audit Logs
The full history of every action in the system.

Cannot do: Open Salary Records, run payroll, see a single payslip number, or approve an expense claim.

HR

Human Resources staff — nearly everything Admin has for people and organization, but cannot touch logins.

Employees
Create, edit, and deactivate any employee; full profiles.

Departments & Job Titles
Full control over the company's org structure.

Attendance
Fix missed check-outs, mark present, correct any day.

Approve Leave
Sees and acts on every leave request, company-wide.

Leave Types & Holidays
Defines leave categories and the holiday calendar.

Document Types
Defines what documents employees can upload.

Company Tasks
Sees and creates tasks across the company.

Audit Logs
The full history of every action in the system.

Cannot do: Anything involving money, resetting passwords, changing Login Roles, or Roles & Permissions.

Accountant

Payroll and finance staff — the mirror of HR: full control over money, almost nothing else.

Salary Records
Sets every employee's salary structure.

Attendance Summary
The day-counts payroll is calculated from, for everyone.

Run Payroll
Runs the month, marks payments paid, downloads any payslip.

Expense Claims
Approves, rejects, or pays claims (never their own).

My Attendance & Leave
Checks themselves in/out; applies for their own leave.

My Tasks & Documents
Their own assigned tasks and uploaded documents.

My Payslips
Downloads their own payslips once paid.

Dashboard
A personal view only — no company-wide numbers.

Cannot do: See the general Employees list, edit anyone's profile, approve leave, or view Audit Logs.

Manager

Automatic, not assigned — anyone with people reporting to them gets this authority, over their own team only.

My Team
Full profile access for direct reports only; company list for everyone else.

Team Attendance
Fix or correct a day — direct reports only.

Leave Requests
Approve or reject — direct reports only.

Team Tasks
Create and assign tasks to their own team.

My Attendance & Leave
Checks themselves in/out; applies for their own leave.

My Documents
Their own uploaded documents.

My Expenses & Payslips
Submits claims; downloads their own payslips.

Dashboard
A personal view only — no company-wide numbers.

Cannot do: Act on anyone outside their direct reporting line, touch payroll, or manage company-wide settings.

Employee

The default role, and the baseline every other role builds on. Everything here is scoped to themselves only.

Dashboard
A personal view: today's attendance, leave balance, own tasks.

My Profile
Their own details.

My Attendance
Checks in/out each day; views their own history and calendar.

My Leave
Applies for leave, views balance and history.

My Tasks
Sees tasks assigned to them.

My Documents
Uploads and manages their own documents.

My Expenses
Submits an expense reimbursement claim.

My Payslips & Holidays
Downloads own payslips; views the holiday calendar.

Cannot do: See anyone else's information at all — not even a colleague's attendance or profile.

Rules That Apply to Everyone

Built into the system itself — not tied to any one Login Role.

1

No approving yourself

Nobody can approve their own leave, mark their own expense claim paid, or correct their own attendance — even a Founder.

2

One set of office hours

9:00 AM start (10 minutes' grace), 1:00–1:30 PM lunch deducted automatically, half-day after a 1:30 PM arrival.

3

A paid month is locked

Once payroll is run and paid for a month, nothing about that month's leave or attendance can change. Corrections move to next month.

4

Everything sensitive is logged

A password reset, a role change, a salary set, a leave approval, an attendance correction — all written to the Audit Log.

Full technical detail, always live in the app:

Admin → Roles & Permissions
